

It's time for something better

We're confident that our solutions will protect your business. **For a limited time, buy 1 year of an Avast Small Business Solution and get 1 year FREE***

With all the recent industry news about ransomware and cyberattacks, we know you might be concerned about your current provider's ability to protect your business from these threats. Avast Business is here to help you keep your business safe online and provide total peace of mind.

Our award-winning cybersecurity solutions consistently outperform other providers and are built for SMBs to help reduce the cost and complexity of cybersecurity. Our comprehensive portfolio of 100% cloud-based endpoint and network security solutions will protect your business from the most advanced breaches.

Why Avast Business?

Easy to install

Enjoy seamless integration on all solutions.

Next-gen AV

Uses artificial intelligence, behavior-based machine learning, and proactive cloud threat lab analysis to detect unknown threats.

Lightweight agent

Features a multi-functional, single, lightweight agent that reacts instantly to malware - without compromising system performance.

All-in-one cybersecurity

Fully integrated add-on services managed through one security platform.

Connect, Troubleshoot, Report

Helps IT admins securely connect to a user's device — anytime, anywhere. Fully integrated in our platform and included for free.

Simple pricing

Obtain cost-effective pricing for enterprise-grade endpoint security.

24/5 US-based support

Get sales engineering and world-class support from our technical experts. We're here for you!

Comprehensive

Generate and schedule easy-to-read, detailed activity reports, directly from the management platform.

Your cybersecurity vendor may have let you down — but we won't

Let us prove it with **1 extra year FREE*** when you buy 1 year

How Avast Business compares to other cybersecurity

Consistent security protection results, year after year

What's the difference?

See how Avast Ultimate Business Security stacks up against the competition according to a recent report by AV-Comparatives.

Malware Protection Test (March 2021)

This test is based on a scenario in which the malware pre-exists on the device's disk or enters the test system through a local area network or removable device (as opposed to directly from the internet).

Real-World Protection Test (March - June 2021)

This test mimics malware attacks that a business user may encounter while browsing online.

Avast	100%
Crowdstrike	99.8%
Cisco	99.7%
Kaspersky	99.6%
Microsoft	99.6%

Avast	99.5%
Malwarebytes	99.2%
Fortinet	99.1%
Sophos	97.8%
Cisco	97.6%
