

Avast Business Antivirus Pro

Advanced antivirus protection for your devices and data

Avast Business Antivirus Pro is an award-winning solution that delivers superior, enterprise-grade protection designed to keep small and medium businesses protected from today's sophisticated cyberthreats – and tomorrow's.

Block cyberthreats from entering your network

Our Web, File, Email, and Behavior Shields work together to actively analyze suspicious information coming and going from devices and block malicious files, dangerous websites, unusual behavior, unauthorized connections, and other threats.

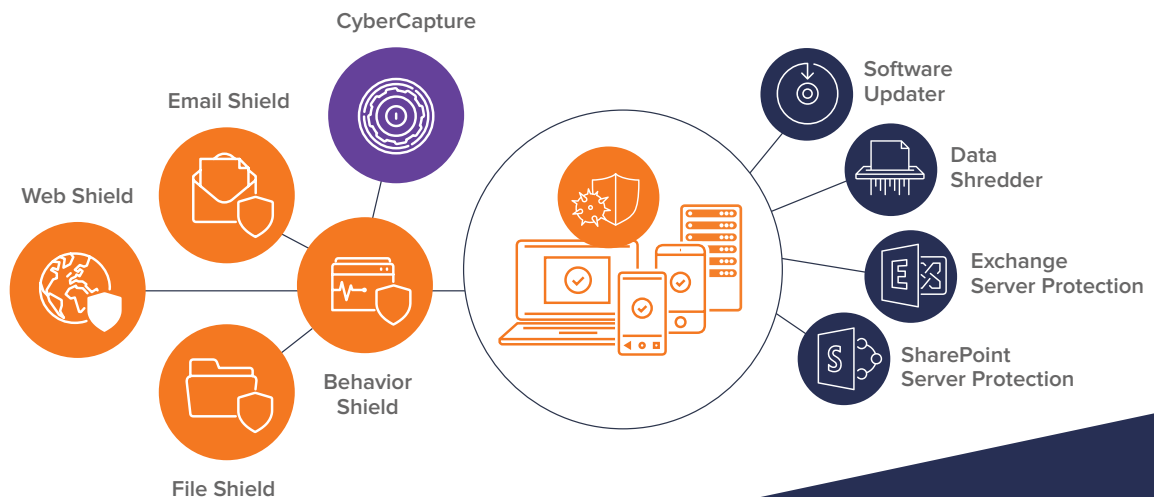

Protect mission-critical data

Avast Business Antivirus Pro scans all files to ensure they are malware free – whether they are shared, or reside in Exchange and Sharepoint servers.

Predict and identify new threats

400 million+ active users in our network provide a continual stream of data that helps us quickly identify and destroy any threat – and predict future ones. Across the globe, our immense cloud-based machine-learning engine is evolving and learning, making our solutions smarter, faster, and more powerful than ever.

How it works

Features

File Shield

Scans any file that is opened or downloaded to make sure it's malware-free.

Web Shield

Checks web URLs and certificates to ensure they are safe before a network connection is made.

Email Shield

Inspects both incoming and outgoing emails to ensure they are completely malware-free.

Behavior Shield

Looks for suspicious behavior in programs installed on devices that may indicate malicious code.

CyberCapture

Detects and analyzes suspicious files in a safe, virtual environment.

Firewall

Monitors all network traffic between your PC and the outside world to prevent unauthorized communication.

Antispam

Keeps dangerous phishing emails and annoying spam from cluttering and compromising inboxes.

SmartScan

Scans for malware, out-of-date patches, unsafe settings, and suspicious add-ons.

Sandbox

Lets users run applications, download files, and visit websites in a secure, virtual environment that is isolated from the rest of your computer.

Wi-Fi Inspector

Scans networks for vulnerabilities, checks network, device, and router settings, and identifies threats.

Real Site

Protects against DNS (Domain Name System) hijacking to ensure the correct website is displayed.

Rescue Disk

Boots up a PC that's been infected with malware from a USB that contains a clean version of the system.

Security Browser Extension

Scans websites for reputation and authenticity, blocks ads, and puts devices in super-safe mode for additional privacy.

Software Updater

Keeps commonly used third-party software up to date to eliminate potential security exploits.

Data Shredder

Overwrites files multiple times to permanently erase sensitive data, making it irretrievable.

Exchange Server Protection

Scans and filters emails at the Exchange server level — stopping potential attacks before they spread to the network.

SharePoint Server Protection

Checks all files uploaded onto shared storage to ensure no malware can compromise data.
